APEXON
GLOBAL TECHNOLOGIES

Technology You Can Depend On.

Capability Statement

The Accountable Engineering Team

WHO WE ARE

Apexon Global Technologies designs, installs, tests, documents and maintains networking, IT infrastructure, and IPTV and audiovisual systems for government institutions, corporate organisations and technology partners.

A core team of two electrical engineers and a telecommunications specialist, led by a founder with a data science background. Further specialists are engaged per project.

COVERAGE AND SCOPE

Based in Nairobi. We work anywhere in Kenya by arrangement.

From small technical fixes to large institutional projects, scoped to what we can deliver well and supported by specialist partners where needed.

SERVICES

Networking & Structured Cabling

Copper and fibre cabling, racks, and patching, designed, installed, labelled, and tested.

IT Infrastructure

Servers, switching, and Wi-Fi that support daily operations without drama.

IPTV & Audiovisual Systems

Displays, IPTV distribution, and meeting-room AV for institutions and corporates.

Maintenance & Technical Support

Planned maintenance and fault support for the systems we install, and for existing networks.

HOW WE DELIVER

1. Assess
2. Design
3. Supply
4. Install
5. Test
