Labelling Scheme

Client: Example Client Ltd (fictional)
Site: Example Office, Nairobi (fictional)
Document no.: SAMPLE-LS-001
Issued: 01/01/2026

How labels are built

Every cable carries the same label at both ends, and the outlet and patch-panel port show it too:

Part	Meaning	Example
F2	Floor number	F2 = second floor
R01	Rack or cabinet on that floor	R01 = first rack
P1	Patch panel in that rack, counted from the top	P1 = top panel
01	Port number on the panel	01 = first port

Full label: F2-R01-P1-01 = floor 2, rack 1, panel 1, port 1.

Other equipment

Item	Format	Example
Rack or cabinet	Floor-Rack	F2-R01
Fibre link between racks	FO-from-to-core	FO-F1R01-F2R01-01
Wi-Fi access point	AP-floor-number	AP-F2-01
Display or screen	TV-room-number	TV-2.03-01
Power (UPS) in rack	UPS-Floor-Rack	UPS-F2-R01

Label materials

Printed, wrap-around cable labels and engraved or printed panel labels that do not fade or peel.

The real scheme is agreed with each client and matches their room numbering.
